

## WHINT® Interface Catalog (SAP CPI)

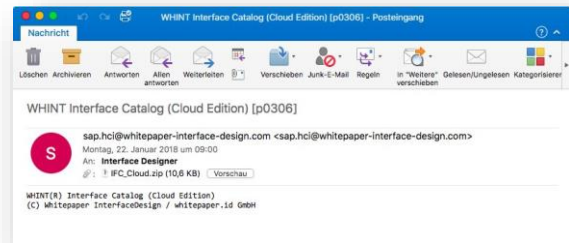

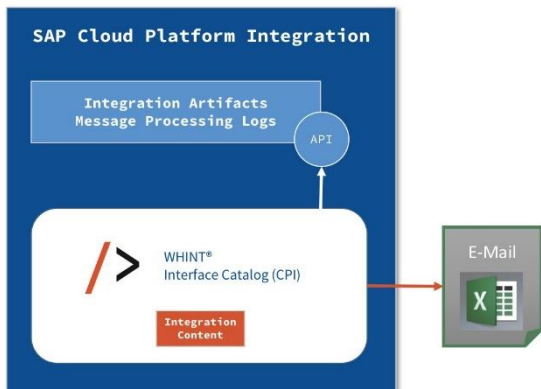

This solution provides you with an Excel overview about your CPI Integration Content: All relevant information from your SAP Cloud Platform Integration Tenant (Integration Artifacts, Message-Processing Information, Keystore Entries and Partner Directory).

### Functionality

Periodical Downloads of iFlows with Messaging Information as an Excel Sheet.  
It answers questions like

- > which integration flows are currently deployed?
- > what message volumes do we have over the month per integration flow?

The solution is using the Standard OData API of SAP CPI and can be deployed on your CPI tenant as an Integration Package or provided as a service (where we would receive read access from our SAP CPI tenant).

The screenshot shows an Excel spreadsheet titled 'Interface Catalog (Cloud Edition)'. The data is organized into columns for Integration Artifact, ID, Version, Type, Deployed By, Deployed On, Status, Completed Messages, Failed Messages, Error Messages, Retry Messages, and Escalated Messages. The table lists various integration artifacts such as AWS\_To\_EMAIL, CLD900\_TwitterCall, Groovy Test, HCI\_2\_Rabbit, HCI\_To\_AWS, HCI\_Variables, Multiple Senders, On-Premise HCI 2 MAIL, Rabbit\_2\_Mail, RequestReply\_ErorHandling, SFTP\_Retry, SFTP\_To\_AWS, Slack\_WHINT, WHINT\_B2G\_VAT\_Check\_EU\_ID, WHINT\_CurrencyRates\_Blockchain.info, and WHINT\_CurrencyRates\_ECB.
