

WHINT® Interface Documentation

This solution creates an automatic documentation of your interface landscape by generating PDF documents in plain text describing your SAP PI/PO Configuration Scenario.

Functionality

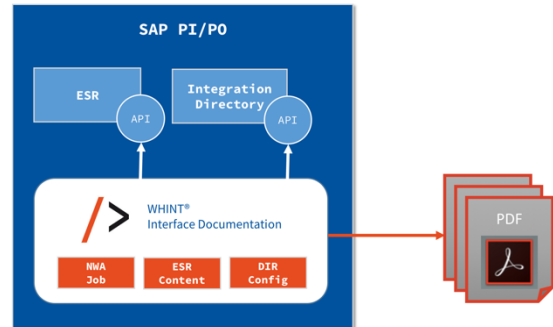

Periodical downloads of all Process Integration Scenarios from PI/PO into PDF documents.

- > One PDF per Configuration Scenario
- > Each Sender Interface generates a new page
- > Each Receiver is listed with all routing rules, interfaces, channel names and mappings
- > Mappings are listed with all mapping steps (program), type and archive

The solution is based on WHINT® Interface Catalog which reads the Integration Directory Content via a Public SAP API.

Prerequisites

- > SAP PI 7.1 and higher releases
- > An existing license of WHINT® Interface Catalog for SAP PI/PO
