

WHINT® Interface Catalog (SAP PI/PO)

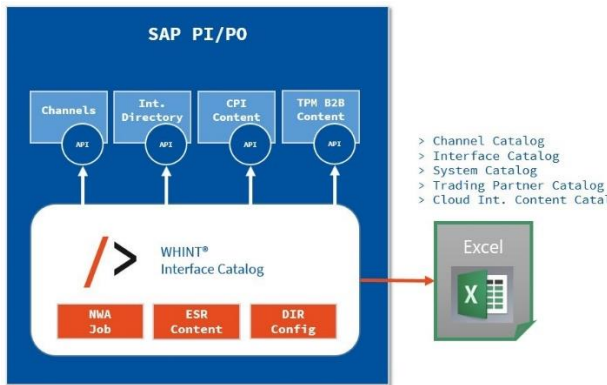

This solution provides you with an overview about your Integration Landscape: All information from your configuration (Integration Directory) of your SAP Process Orchestration/PI System.

Functionality

Periodical downloads of PI/PO integration content as Excel Sheets. It provides an overview about interfaces & integration content and answers questions like:

- > what are the routing conditions for Partner X or IDoc Y ?
- > where do we use a specific FTP host?
- > where do we use Content Conversion (also via the MessageTransform Bean) ?

- > Interface Catalog (based on all Integrated Configurations)
- > Channel Catalog (based on all Communication Channels)
- > System Catalog (based on all Parties, Components and Business Systems)
- > Trading Partner Catalog (based on TPM of SAP B2B Add-on)
- > Cloud Integration Content (based on locally deployed CPI Integration Artifacts)

The screenshot shows a detailed Excel spreadsheet titled 'Channel Catalog'. It contains multiple columns including Name, Description, and various technical parameters related to communication channels in SAP PI/PO.
