## InterfaceDesign

WHINT® Interface Catalog (On-Premise)

This solution provides you with an overview about your Integration Landscape: All information from your configuration (Integration Directory) of your SAP Process Orchestration System.

Functionality

Periodical downloads of Process Orchestration integration content as Excel Sheets. It provides an overview about interfaces & integration content and answers questions like:

> what are the routing conditions for Partner X or IDoc Y?
> where do we use a specific FTP host?
> where do we use Content Conversion (also via the MessageTransform Bean)?

> Interface Catalog (based on all Integrated Configurations)
> Channel Catalog (based on all Communication Channels)
> System Catalog (based on all Parties, Components and Business Systems)
> Trading Partner Catalog (based on TPM of SAP B2B Add-on)
> Cloud Integration Content (based on locally deployed Cloud Integration Artifacts)

Documentation
http://doc.whint.net/whint-interfacecatalog-sap-pro

Pricing Interface Management Suite
http://blog.whint.de/whint-solutions/ifm-sap-pi-po

The solution is using Standard APIs of SAP Process Orchestration and produces the following Excel docs:
