

WHINT® Interface Catalog (Cloud)

This solution provides you with an Excel overview about your Cloud Integration Content: All relevant information from your SAP Cloud Integration Tenant (Integration Artifacts, Message-Processing Information, Partner Directory) as well as APIs from SAP Business Technology Platform API Management.

Functionality

Periodical Downloads of iFlows with Messaging Information as an Excel Sheet. It answers questions like

- > which integration flows are currently deployed?
- > what message volumes do we have over the month per integration flow?

Interface Catalog (Cloud Edition)																		
Integration Artifact	Description	ID	Version	Type	Package	Deployed By	Deployed On	Status	Completed			Failed			Escalated	Configuration Parameters		
									Msg	Date	Duration (s)	Msg	Date	Msg		Date	Msg	Date
Communicate to SH	This is a single, multi-purpose integration flow, which does all types of requests	com.sap.GS.Span.SP.Com	3.0.2	Integration flow	iDocumentUA/Registrar/Bookings/Upgen		27.03.19 17:14	started	3	14.12.19	1.422	29				MsgBodySize	100

91	14.12.19	0.808																

The solution is using the Standard OData API of SAP Cloud Integration and can be deployed on your Cloud Integration tenant as an Integration Package or provided as a service (where we would receive read access from our SAP Cloud Integration tenant). The following documents are being created:

- > **Interface Catalog, Partner Directory** (SAP Cloud Integration)
- > **API Catalog** (SAP CP API Management)
- > **Landscape Check** (SAP Cloud Integration Tenant comparison)
