

WHINT® Azure ServiceBus (SAP PI/PO)

This JCA Adapter for SAP PI / SAP Process Orchestration (PO) supports the integration with Microsoft Azure Service Bus. It connects asynchronously as a client to queues and topics to both send or receive messages.

Functionality

Seamless integration between SAP PI/PO and Microsoft Azure Service Bus using Microsoft's official SDK for Java 8:

- > Authentication via SAS (Shared Access Signature)
- > Set Queue/Topic dynamically (Receiver Channels)
- > Correlations
- > Custom Message Properties
- > Content Type
- > JSON<->XML conversion via Adapter Module
- > Supports Adapter Specific Message Attributes (ASMA)/Dynamic Configuration
- > Event-based or scheduled Polling (Sender Channels)
- > Exactly-Once (EO), Exactly-Once-In-Order (EOIO)
- > Deadletter Queues (Sender Channels)
