

## WHINT® Interface Catalog (On-Premise)

This solution provides you with an overview about your Integration Landscape: All information from your configuration (Integration Directory) of your SAP Process Orchestration System.

### Functionality

Periodical downloads of Process Orchestration integration content as Excel Sheets. It provides an overview about interfaces & integration content and answers questions like:

- > what are the routing conditions for Partner X or IDoc Y?
- > where do we use a specific FTP host?
- > where do we use Content Conversion (also via the MessageTransformBean)?

The solution is using Standard APIs of SAP Process Orchestration and produces the following Excel docs:

- > Interface Catalog (based on all Int. Configurations)
- > Channel Catalog (Communication Channels)
- > Systems Catalog (Parties, Comp., Business Systems)
- > Trading Partner Catalog (based on SAP PI B2B Add-on)
- > Cloud Integration Content (local CPI Artifacts)
- > Backend Interfaces (based on SAP ABAP)
- > Landscape Check for SAP Cloud Integration
