

WHINT® Interface Catalog (SAP Integration Suite)

This solution provides you with an Excel overview about your SAP Integration Suite Tenant: All relevant information from your SAP Cloud Integration Tenant (Integration Artifacts, Message-Processing Information, Partner Directory) as well as APIs from SAP BTP API Management.

Functionality

Periodical Downloads of iFlows with Messaging Information as an Excel Sheet (e.g. into SharePoint Online).
It answers questions about

- > message traffic (count & duration) per integration flow per month?
- > externalized parameter values
- > integration flow dependencies (ProcessDirect, JMS)
- > Schedules (Timer, Sender Channels)

Interface Catalog (Cloud Edition)																									
Whisperer interfaceDesign																									
Integration Artifact	Description	ID	Version	Type	Package	Deployed By	Deployed On	Status	Completed			Failed			Excluded			Configuration Parameters							
									Msg.	Size	Duration	Msg.	Size	Duration	Msg.	Size	Duration	Key	Value						
Communicate to SII	This is a single, multi-purpose integration flow, which does all types of requests	com.sap.GS.Span.SII.Con	3.0.2	Integration flow	eDocumentVTRRegisterBookingsOpen		27.03.19 17:14	started	127913									Key		Value

The solution is using the Standard OData API of SAP BTP and can be deployed on your Cloud Integration tenant as an Integration Package or provided as a service (where we would receive read access from our SAP Cloud Integration tenant). The following documents are being created:

- > **Interface Catalog, Partner Directory** (SAP Cloud Integration)
- > **API Catalog** (SAP API Management)
- > **Landscape Check** (SAP Cloud Integration Tenant comparison)
